

SHARP IMAGE™

Superior Quality Intraoral X-Ray Film

NEW ULTRA SOFT

Patient Comfort, Comfortable Price

- Excellent Image Detail & Clarity
- Economical Premium Brand
- No Change in Technique

Sharp Image ULTRA SOFT D Speed film is high-contrast and fine detailed, resulting in superior image quality. No need to change from your current exposure settings or developing techniques.

Sharp Image ULTRA SOFT F Speed reduces patient radiation exposure up to 60% while maintaining excellent detail and contrast.

ULTRA SOFT vinyl packets increase patient comfort and compliance. D and F Speed Film can be purchased in single and double packets of size 0 and size 2. Both may be developed using automatic or manual techniques.

Made in the USA.
